INTRODUCTION

The Statistics Section of the OFM comes under the direction of the Technical, Research and Consulting Services Unit. Statistics gathered by this unit are used to report fire losses and to identify fire loss trends. These statistics play a significant role in identifying areas of concern and aid in developing provincial initiatives.

The Statistics Section receives more than 15,000 reports each month, including investigation reports on all fatalities, incendiary fires, large loss fires and explosions, as well as reports from fire departments, insurance companies or insurance adjusters.

To expedite the processing of these documents, the province is divided into geographic areas and one staff member is responsible for each area. This is to ensure that the fire departments are familiar with the staff member responsible for their documents.

Each report must be checked by the statistics staff before it is keyed into the system. Changes must often be made by the staff, and telephone calls made to the various fire departments to check and verify information. It would be helpful if the fire departments would make use of the remarks section on the back of the forms to aid the OFM staff.

Accurate stastistics depend on many people, from the person who reports the fire, to the dispatcher, the fire fighters, and the person completing the forms. To all those involved, thank you for your efforts!
